GEVEKO MARKINGS

Environmental policy

Scope for the Management System

Geveko Markings develop, manufacture and supply road marking and safety materials, coatings and road repair products globally, to markets within the horizontal road and decorative markings. Our products include preformed, hot-applied thermoplastics, paints and plural components, glass beads, aggregates and traffic safety equipment.

AMBITIONS

- To be the best road marking materials partner in the eyes of our customers.
- To be the number one road marking supplier in our core markets.
- Use ISO 14001 to improve sustainability.

WHERE

- We have focus on sustainability across our business processes.
- Customer segments are applicators and surface owners.
- All our sites strive to work according to the principles of ISO 14001.

HOW

- To be the industry specialist and leader in sustainability.
- We work proactively to protect the environment, prevent pollution and to reduce energy and waste in our business.
- Our environmental management systems support constant improvement of our sustainable environmental footprint.

CAPABILITIES

- We have a deep understanding of our stakeholders needs and expectations.
- We fulfill our binding obligations with our stakeholders, including compliance to relevant legislation.
- Our digital sustainability systems ensure data driven processes to minimize our environmental impact.

MANAGEMENT

- We have an environmental management system to ensure improvements and stable environmental performance.
- Our people drive the business based on our common values and culture.
- Constantly improving environmental performance is a natural part of the daily business that engages all our people.

This policy is considered as a framework for the common environmental objectives within the Geveko Markings Group.
In addition, each site within the Group will establish local environmental goals and action plans based on local conditions.
We comply with binding obligations and relevant legislation and are committed to continuous improvement of our management system.
